40^o anniversary
1969 - 2009
40 years of Italian quality

intro

made in Italy 

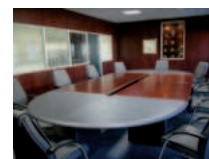

price list 2012.1

La storia della Rubinetteria Malgorani coincide con la storia dei riduttori di pressione per acqua con funzionamento a pistone. Negli anni '50 Vittorio Malgorani iniziava la produzione di riduttori di pressione a pistone e la storia del suo inventato, dalla sua esperienza si sviluppa la grande tradizione Malgorani nella produzione di riduttori di pressione e articoli per impianti idraulici.

The story of Rubinetteria Malgorani is the story of pressure reducing valves with piston system: in years '50 Vittorio Malgorani began the production of pressure reducing valves with piston system which he himself invented; his inventions and experience are the root of the Malgorani's great tradition in manufacturing pressure reducing valves and hydraulic components.

L'azienda nasce ufficialmente nel 1957 per opera di Vittorio Malgorani e dal 1969 viene fondata la Rubinetteria Malgorani Pietro. Dalla nascita l'azienda opera in due locali con una superficie di 40 mq nel centro del paese di Colazza; negli anni successivi lo sviluppo è lento, ma continuo, mantenendo sempre l'attenzione sulla qualità dei prodotti. All'inizio degli anni '70 la società si trasferisce in un'area nella periferia del paese dove attualmente si trovano le due unità produttive della società che occupano una superficie coperta di 5.600 mq.

The company officially started in 1957 thanks to the effort of Vittorio Malgorani. In 1969, the company becomes Rubinetteria Malgorani Pietro. Since its foundation the company is located in two small rooms of 40 sqm in the centre of the small village of Colazza; along the years the development of the company was moderate but continuous, always focusing attention on quality and care in manufacturing products. In late 70s the company moved into an area on the outskirts of the village, where the company is now-a-days located with a covered surface of 5.600 sqm.

Con più di 23 macchine automatiche il reparto torneria Malgorani è il cuore dell'azienda; la completa automazione dei processi e l'alta tecnologia permettono al reparto di produrre più di 130.000 componenti al giorno.

With more than 23 machines, the production shop is the heart of the turning department Malgorani thanks to the complete automation of the production the area of the company is able to manufacture more than 130.000 of components per day

Il magazzino di 2.000 mq di componenti semilavorati rifornisce il reparto assemblaggio e spedizioni garantendo rapide consegne e massima flessibilità produttiva. Il costante sviluppo nei sistemi produttivi e gestione delle risorse permette alla Malgorani una capacità produttiva di oltre 4.000 riduttori di pressione al giorno.

A warehouse 2.000 sqm of semi-manufactured components which feeds assembly line and packaging, is a guarantee of quick delivery terms and maximum flexibility. The continuous development of manufacturing process allow our company to manufacture more than 4.000 pressure reducing valves per day.

CONDIZIONI GENERALI DI VENDITA

Salvo disposizioni particolari il rapporto commerciale seguirà le seguenti condizioni:

- tutte le informazioni contenute sono suscettibili di variazione in qualsiasi momento e senza preavviso;
- gli ordini ricevuti non impegnano la nostra società in termini di condizioni e consegna;
- in caso di accettazione dell'ordine verrà emessa la regolare conferma d'ordine;
- i prezzi indicati si intendono con resa franco nostro magazzino;
- i termini di consegna sono concordati di volta in volta in base a disponibilità e carico di lavoro; in nessun caso sono previsti indennizzi per eventuali ritardi nella consegna;
- La garanzia sui prodotti Malgorani è di 24 mesi; la garanzia è valida esclusivamente per vizio di prodotto;
- L'invio di prodotti resi dovrà sempre essere autorizzato dalla nostra società; i costi di trasporto saranno sempre a carico del cliente;
- I prodotti resi difettosi verranno analizzati solo nel caso in cui le indicazioni di installazione siano state scrupolosamente seguite;
- La nostra società si impegna a risarcire gli eventuali danni causati esclusivamente per vizio di prodotto;
- I danni eventuali dovranno essere valutati dal personale incaricato dalla nostra società assicuratrice; in caso contrario, nessun danno verrà riconosciuto.
- Il materiale venduto con resa in porto franco viaggia a rischio e pericolo del cliente;
- I prodotti Malgorani sono coperti a norma di legge da assicurazione per responsabilità civile;
- L'accettazione delle presenti condizioni da parte del cliente presuppone la rinuncia alle proprie condizioni di acquisto; ogni altra condizione dovrà essere stabilita di mutuo accordo.

EUROKIT

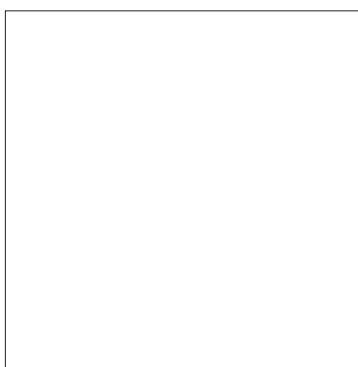

Gruppo di allacciamento preassemblato composto da filtro Neptune con manometri, riduttore di pressione Eurobrass 142 in ottone ad azione diretta con funzionamento a pistone, dispositivo anticampo d'ariete Stopshock. Completo di raccordi e preassemblato pronto all'installazione.

Principali caratteristiche:

Pressione massima: 25 bar
 Campo di regolazione in uscita: 0,5 - 6 bar
 Temperatura massima di esercizio: 80° C
 Pretaratura: 3 bar
 Attacchi: UNI EN ISO 228
 Corpo: Lega ottone CW617N UNI EN 12165
 Attacco manometro: 1/4"

Articoli nel kit: filtro Neptune 100micron, riduttore Eurobrass MM, valvola Stopshock, raccordi di collegamento, manometri.

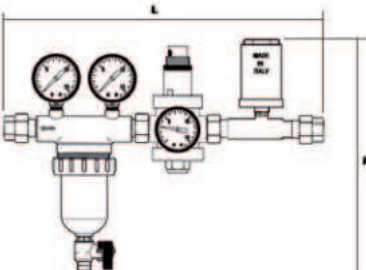

Connection kit composed of self-cleaning filter Neptune 100micron with pressure gauges, direct acting pressure reducing valve Eurobrass 142 brass diaphragm operating, water hammer arrestor Stopshock. Body and components made of brass, DSB® system, stainless steel seat, adjustable outlet pressure and compensation system, 100micron replaceable cartridge. Included brass fittings for connection, preassembled ready for installation.

Main features:

Maximum inlet pressure: 25 bar
 Outlet pressure range: 0,5 - 6 bar
 Maximum working temperature: 80° C
 Factory setting: 3 bar
 Threadings: UNI EN ISO 228
 Alloy: Brass alloy CW617N UNI EN 12165
 Gauge connection: 1/4"

Items included: self-cleaning filter Neptune 100micron, Eurobrass MM pressure reducing valve, Stopshock valve, connection fittings, pressure gauges.

RIDUTTORI DI PRESSIONE - PRESSURE REDUCING VALVES

EUROFILTER 140

Riduttore di pressione in ottone ad azione diretta con funzionamento a membrana, con filtro incorporato e presa manometro in entrata ed uscita. Pressione regolabile e sistema della compensazione della pressione in uscita. Membrana brevettata.

Principali caratteristiche:

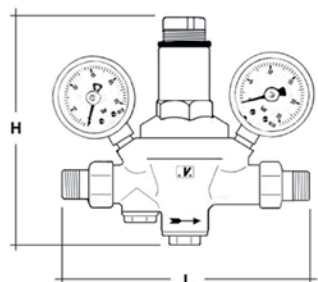

Pressione massima: 25 bar
 Campo di regolazione in uscita: 1 - 7 bar
 Temperatura massima di esercizio: 80° C
 Pretaratura: 3 bar
 Attacchi: M-M ISO 228
 Corpo: Lega ottone CW617N UNI EN 12165
 Attacco manometro: 1/4"
 Manometro consigliato: manometro diam.50 scala 0-25 bar in entrata e 0-10 in uscita, attacco 1/4" radiale - Art. 119.50.25 e Art. 119.50.10

Direct acting pressure reducing valve for water with diaphragm system, with built in filter and double gauge port inlet and outlet. Adjustable outlet pressure and compensation system. Patented membrane.

Main features:

Maximum inlet pressure: 25 bar
 Outlet pressure range: 1 - 7 bar
 Maximum working temperature: 80° C
 Factory setting: 3 bar
 Threadings: F-F UNI EN ISO 228
 Alloy: Brass alloy CW617N UNI EN 12165
 Gauge connection: 1/4"
 Suggested gauges: pressure gauge diam. 50 range 0-25 on inlet and 0-10 on outlet, connection 1/4" radial - Item 119.50.25 and 119.50.10

RIDUTTORI DI PRESSIONE - PRESSURE REDUCING VALVES

MINIBRASSBLU

Riduttore di pressione in ottone ad azione diretta con funzionamento a pistone, ideale per piccole installazioni, macchinari e distributori di bevande. Pressione regolabile e sistema della compensazione della pressione in uscita. Modello brevettato.

Principali caratteristiche:

Pressione massima: 15 bar

Campo di regolazione in uscita: 1 - 4 bar

Temperatura massima di esercizio: 80° C

Pretaratura: 3 bar

Attacchi: F-F ISO 228

Connessione manometro: 1/4" (disponibile solo per art. 105.BG - 106.BG - 109.BG)

Manometro consigliato: manometro diam. 63 scala 0-6 bar, attacco 1/4" radiale - Art. 119.6

Direct acting pressure reducing valve for water with brass diaphragm system, specific for water dispenser, alimentary use. Adjustable outlet pressure and compensation system. Patent pending.

Main features:

Maximum inlet pressure: 15 bar

Outlet pressure range: 1 - 4 bar

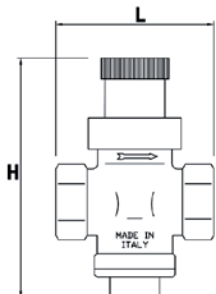

Maximum working temperature: 80° C

Factory setting: 3 bar

Threadings: F-F UNI EN ISO 228

Gauge connection: 1/4" (only available for items 105.BG - 106.BG - 109.BG)

RIDUTTORI DI PRESSIONE - PRESSURE REDUCING VALVES

MINIBRASS 106 VIT

Riduttore di pressione in ottone ad azione diretta con funzionamento a pistone, ideale per piccole installazioni, macchinari speciali. Versione VIT per uso con acqua calda e gasolio. Pressione regolabile e sistema della compensazione della pressione in uscita. Versione con attacco manometro. Modello brevettato.

Principali caratteristiche:

Pressione massima: 15 bar

Campo di regolazione in uscita: 1 - 4 bar

Temperatura massima di esercizio: 130° C

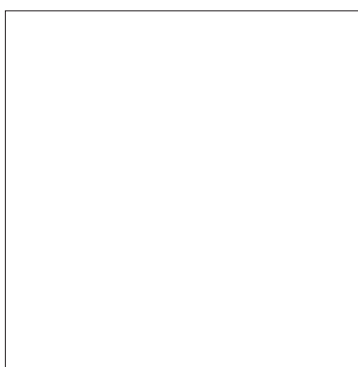

Pretaratura: 3 bar

Attacchi: F-F ISO 228

Corpo: Lega ottone CW617N UNI EN 12165

Attacco manometro: 1/4"

Manometro consigliato: manometro diam. 63 scala 0-6 bar, attacco 1/4" radiale - Art. 119.6

Direct acting pressure reducing valve for water with brass diaphragm system, specific for small installation and machines. VIT version for use with hot water or diesel oil. Adjustable outlet pressure and compensation system. Version with pressure gauge port. Patent pending.

Main features:

Maximum inlet pressure: 15 bar

Outlet pressure range: 1 - 4 bar

Maximum working temperature: 130° C

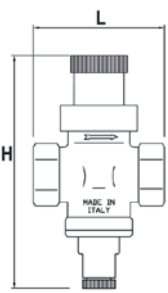

Factory setting: 3 bar

Threadings: F-F UNI EN ISO 228

Alloy: Brass alloy CW617N UNI EN 12165

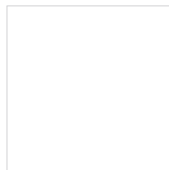

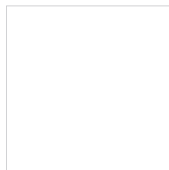

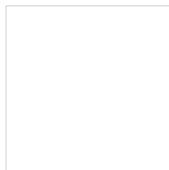

Gauge connection: 1/4"

Suggested gauge: diam. 63 range 0-6 bar, connection 1/4" radial - Item N 119.6

RIDUTTORI DI PRESSIONE - PRESSURE REDUCING VALVES

VENUS

Kit di allacciamento in linea per distributori di bevande, completamente in ottone composto da valvola, filtro, intercettazione e riduttore di pressione. Entrata per tubo da 15mm o 1/2" M, uscita 3/4" M per collegamento diretto con dispositivi Water-Block. Versione VENUS S in linea; versione VENUS Q ad angolo.

Principali caratteristiche:

Pressione massima: 15 bar

Campo di regolazione in uscita: 1 - 4 bar

Temperatura massima di esercizio: 80° C

Pretaratura: 3 bar

Attacchi: entrata 15mm tubo rame o 1/2" M - uscita 3/4" M

Corpo: Lega ottone CW617N UNI EN 12165

Conforme D.M. 174/2004

Riduttore brevettato.

Connection kit for beverage machines, completely made in brass with ball valve, strainer, check valve and pressure reducing valve. Inlet connection 15mm copper pipe or 1/2" M, outlet 3/4" M for direct connection with Water-Block device. Available in straight version VENUS S or elbow version VENUS Q.

Main features:

Maximum inlet pressure: 15 bar

Outlet pressure range: 1 - 4 bar

Maximum working temperature: 80° C

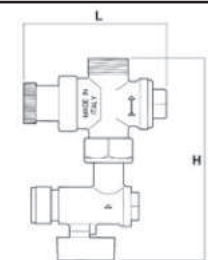

Factory setting: 3 bar

Threadings: inlet 15mm copper pipe or 1/2" M; outlet 3/4" M

Alloy: Brass alloy CW617N UNI EN 12165

RIDUTTORI DI PRESSIONE - PRESSURE REDUCING VALVES

EUROBRASS PN 40

Riduttore di pressione in ottone ad azione diretta con funzionamento a pistone, PN40, disponibile con raccordi FF (art. 115) oppure filettato FF (art. 143). Struttura rinforzata, vitone superiore alta resistenza, molla di precarico maggiorata, sistema DSB®, asta e sede in acciaio inox, pressione regolabile e sistema della compensazione della pressione in uscita.

Principali caratteristiche:

Pressione massima: 40 bar

Campo di regolazione in uscita: 0,5 - 6 bar

Temperatura massima di esercizio: 80° C

Pretaratura: 3 bar

Attacchi: UNI EN ISO 228

Corpo: Lega ottone CW617N UNI EN 12165

Attacco manometro: 1/4"

Manometro consigliato: manometro diam. 63 scala 0-10 bar, attacco 1/4" posteriore - Art. 119/10

Direct acting pressure reducing valve for water with brass diaphragm system, PN40, available with FF unions (item N 115) or FF direct threadings (item N 143). Stronger structure, bigger upper cap and spring, DSB® system, stainless steel bar and seat, adjustable outlet pressure and compensation system.

Main features:

Maximum inlet pressure: 40 bar

Outlet pressure range: 0, - 6 bar

Maximum working temperature: 80° C

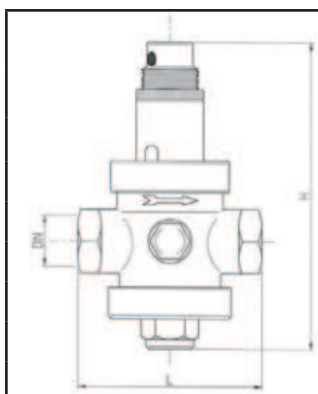

Factory setting: 3 bar

Threadings: UNI EN ISO 228

Alloy: Brass alloy CW617N UNI EN 12165

Gauge connection: 1/4"

Suggested gauge: diam. 63 range 0-10 bar, connection 1/4" axial - Item N 119/10

RIDUTTORI DI PRESSIONE - PRESSURE REDUCING VALVES

EUROBRASSBLU FF PN 25

Riduttore di pressione in ottone ad azione diretta con funzionamento a pistone, specifico per acqua potabile, PN25. Componenti singoli certificati per uso alimentare, sistema DSB®, sede in acciaio inox, pressione regolabile e sistema della compensazione della pressione in uscita.

Principali caratteristiche:

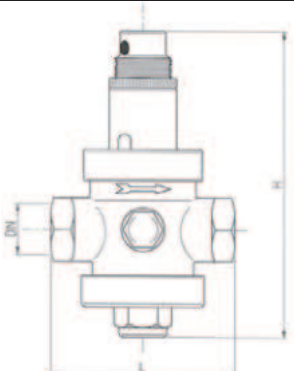

Pressione massima: 25 bar
 Campo di regolazione in uscita: 0,5 - 6 bar
 Temperatura massima di esercizio: 80° C
 Pretaratura: 3 bar
 Attacchi: UNI EN ISO 228
 Corpo: Lega ottone CW617N UNI EN 12165
 Attacco manometro: 1/4"
 Manometro consigliato: manometro diam. 63 scala 0-10 bar, attacco 1/4" posteriore - Art. 119/10

Direct acting pressure reducing valve for water with brass diaphragm system specific for potable water, PN25. Every single component is certified for alimentary use, DSB® system, stainless steel seat, adjustable outlet pressure and compensation system.

Main features:

Maximum inlet pressure: 25 bar
 Outlet pressure range: 0,5 - 6 bar
 Maximum working temperature: 80° C
 Factory setting: 3 bar
 Threadings: UNI EN ISO 228
 Alloy: Brass alloy CW617N UNI EN 12165
 Gauge connection: 1/4"
 Suggested gauge: diam. 63 range 0-10 bar, connection 1/4" axial - Item N 119/10

EUROBRASS - 36

RIDUTTORI DI PRESSIONE - PRESSURE REDUCING VALVES

EUROBRASS 143 FF PN 25 VIT 130° C

Riduttore di pressione in ottone ad azione diretta con funzionamento a pistone, PN25, filettato FF sul corpo, specifico per acqua calda e gasolio. Struttura e componenti interni completamente in metallo, sistema DSB®, sede in acciaio inox, pressione regolabile e sistema della compensazione della pressione in uscita.

Principali caratteristiche:

Pressione massima: 25 bar

Campo di regolazione in uscita: 0,5 - 6 bar

Temperatura massima di esercizio: 130° C

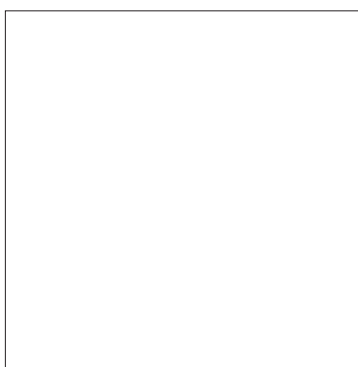

Pretaratura: 3 bar

Attacchi: UNI EN ISO 228

Corpo: Lega ottone CW617N UNI EN 12165

Attacco manometro: 1/4"

Manometro consigliato: manometro diam. 63 scala 0-10 bar, attacco 1/4" posteriore - Art. 119/10

Direct acting pressure reducing valve for water with brass diaphragm system, PN25, FF threading, specific for hot water and diesel oil. Body and components made in brass, DSB® system, stainless steel seat, adjustable outlet pressure and compensation system.

Main features:

Maximum inlet pressure: 25 bar

Outlet pressure range: 0,5 - 6 bar

Maximum working temperature: 130° C

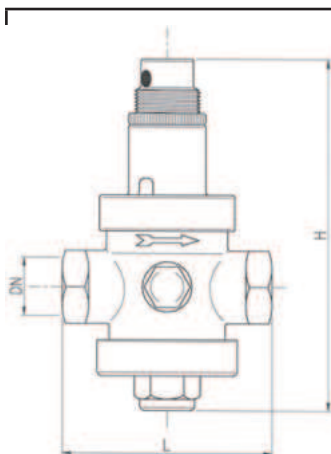

Factory setting: 3 bar

Threadings: UNI EN ISO 228

Alloy: Brass alloy CW617N UNI EN 12165

Gauge connection: 1/4"

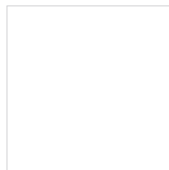

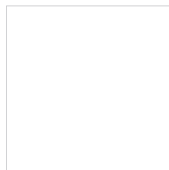

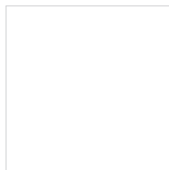

Suggested gauge: diam. 63 range 0-10 bar, connection 1/4" axial - Item N 119/10

SPECIFICA PRODOTTO

Femmina in entrata, bocchettone Maschio in uscita.

DSB®: il sistema DSB (Double Safety Bar) è un brevetto Rubinetteria Malgorani che migliora la precisione di funzionamento dei riduttori di pressione e la protezione da danni causati dalle impurità presenti nel liquido

PRODUCT SPECIFICATION

Female inlet and outlet Male.

DSB®: the **DSB®** system (Double Safety Bar) is a patent by Rubinetteria Malgorani which improve the precision in functioning of the valve and prevent from damages caused by pollution in water.

RIDUTTORI DI PRESSIONE - PRESSURE REDUCING VALVES

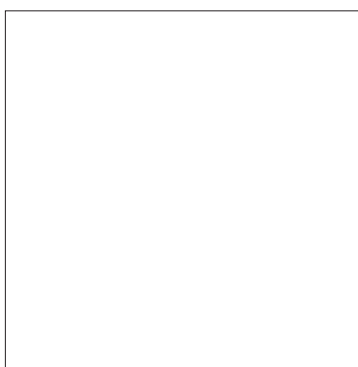

EUROBRASS 143 FL

Riduttore di pressione con attacchi flangiati ad azione diretta con funzionamento a pistone. Corpo in bronzo, sede in acciaio inox, asta in acciaio inox. Pressione regolabile e sistema della compensazione della pressione in uscita. Flange PN 16 a norma UNI EN 1092-3 a 4 fori.

Principali caratteristiche:

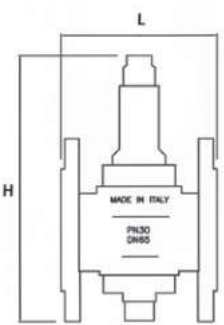

Pressione massima: 30 bar
 Campo di regolazione in uscita: 1 - 7 bar
 Temperatura massima di esercizio: 80° C
 Pretaratura: 3 bar
 Attacchi: UNII EN 1092-3 a 4 fori
 Connessione manometro: 1/4"
 Manometro consigliato: manometro glicerina diam. 63 scala 0-16 bar, attacco 1/4" radiale - Art. 119.16.GL

Flanged direct acting pressure reducing valve for water with brass diaphragm system. Bronze body, stainless steel seat, stainless steel bar. Adjustable outlet pressure and compensation system. Flanges PN 16 UNI EN 1092-3 with 4 holes.

Main features:

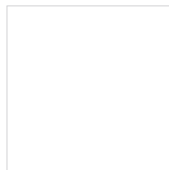

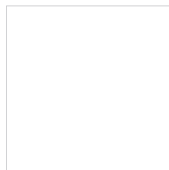

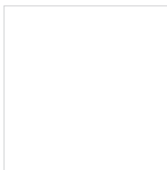

Maximum inlet pressure: 30 bar
 Outlet pressure range: 1 - 7 bar
 Maximum working temperature: 80° C
 Factory setting: 3 bar
 Threadings: UNI EN ISO 228
 Gauge connection: 1/4"
 Suggested gauge: diam. 63 glycerine filled, range 0-16 bar, connection 1/4" radial - Item N 119.16GL

VASO D'ESPANSIONE - EXPANSION VESSEL

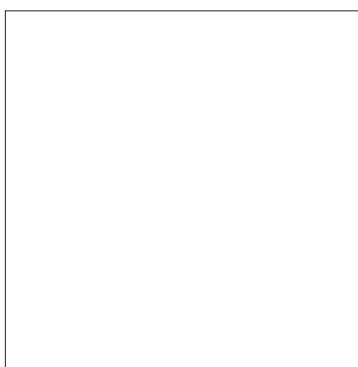

HP.5

Vaso d'espansione idrico a membrana fissa, costruiti in acciaio carbonio. Consigliamo l'installazione del vaso d'espansione a valle dei riduttori di pressione al fine assorbire gli eccessi di pressione che si possono generare negli impianti soggetti a variazione di temperatura.

Principali caratteristiche:

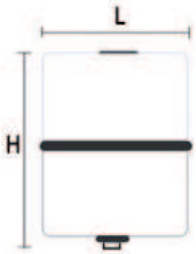

Pressione massima: 10 bar
Pressione di precarica: 3 bar
Temperatura di esercizio: -10° C / 99° C
Filettatura di collegamento: 3/4" M
Attacchi: UNI EN 228

Expansion tanks for water with fixed butyl membrane; body manufactured in carbon steel. We recommend using the expansion tank downstream of pressure reducing valves in order to absorb the excess pressure that can be generated in plants subjected to temperature variation.

Main features:

Maximum pressure: 10 bar
Factory precharge: 3 bar
Working temperature range: -10° C / 99° C
Connection: 3/4" M
Threadings: UNI EN ISO 228

FILTRI AUTOPULENTI - SELF-CLEANING FILTERS

NEPTUNE 300 micron PN 25

Filtro autopulente in ottone con cartuccia in acciaio inox a grande superficie; collegamenti filettati FF e valvola di scarico con portagomma. Struttura completamente in ottone permette il montaggio a monte dei riduttori di pressione.

Facile installazione e utilizzo: i due manometri permettono di verificare la pressione a monte e a valle; se la pressione indicata è la stessa il filtro è pulito; se le pressioni sono diverse il filtro necessita la pulizia. Pulizia del filtro: aprendo la valvola di scarico il filtro si pulisce autonomamente; in caso di depositi più consistenti è possibile aprire la parte inferiore del filtro e procedere alla pulizia manuale della cartuccia o alla sua sostituzione.

Principali caratteristiche:

Pressione massima: 25 bar

Temperatura massima di esercizio: 130° C

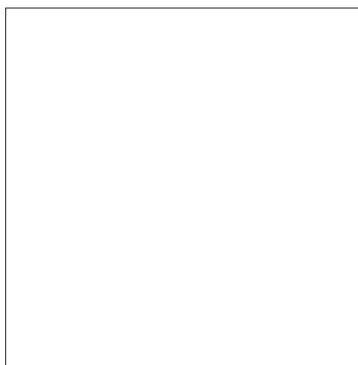

Grado di filtrazione: 300 micron

Attacchi: UNI EN ISO 228

Corpo: Lega ottone CB753S UNI EN 1984

Attacco manometro: 1/4"

Manometro consigliato: manometro diam. 63 scala 0-16 bar, attacco 1/4" radiale - Art. 119.16

Brass self-cleaning filter with wide stainless steel cartridge; FF threaded connections and drain valve with hose. Made entirely of brass allows the assembly upstream of pressure reducing valves.

Easy installation and use: the two gauges are used to check the pressure upstream and downstream, if the pressure is defined as the same filter is clean, if the pressures are different the filter needs cleaning. Cleaning the filter: by opening the drain valve self cleans the filter in case of larger stores you can open the bottom of the filter and proceed to the manual cleaning of the cartridge or replace it.

Main features:

Maximum inlet pressure: 25 bar

Maximum working temperature: 130° C

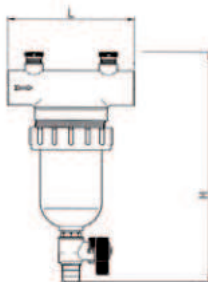

Filtration: 300 micron

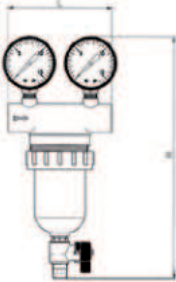

Threadings: UNI EN ISO 228

Alloy: Brass alloy CB753S UNI EN 1984

Gauge connection: 1/4"

Suggested gauge: diam. 63 range 0-16 bar, connection 1/4" radial - Item N 119.16

FILTRI AUTOPULENTI - SELF-CLEANING FILTERS

NEPTUNE 100 micron PN 25

Filtro autopulente in ottone con cartuccia in acciaio inox a grande superficie; collegamenti filettati FF e valvola di scarico con portagomma. Struttura completamente in ottone permette il montaggio a monte dei riduttori di pressione.

Facile installazione e utilizzo: i due manometri permettono di verificare la pressione a monte e a valle; se la pressione indicata è la stessa il filtro è pulito; se le pressioni sono diverse il filtro necessita la pulizia. Pulizia del filtro: aprendo la valvola di scarico il filtro si pulisce autonomamente; in caso di depositi più consistenti è possibile aprire la parte inferiore del filtro e procedere alla pulizia manuale della cartuccia o alla sua sostituzione.

Principali caratteristiche:

Pressione massima: 25 bar

Temperatura massima di esercizio: 130° C

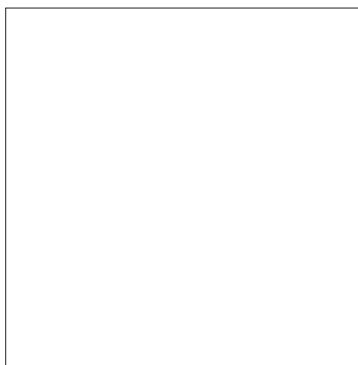

Grado di filtrazione: 100 micron

Attacchi: UNI EN ISO 228

Corpo: Lega ottone CB753S UNI EN 1984

Attacco manometro: 1/4"

Manometro consigliato: manometro diam. 63 scala 0-16 bar, attacco 1/4" radiale - Art. 119.16

Brass self-cleaning filter with wide stainless steel cartridge; FF threaded connections and drain valve with hose. Made entirely of brass allows the assembly upstream of pressure reducing valves.

Easy installation and use: the two gauges are used to check the pressure upstream and downstream, if the pressure is defined as the same filter is clean, if the pressures are different the filter needs cleaning. Cleaning the filter: by opening the drain valve self cleans the filter in case of larger stores you can open the bottom of the filter and proceed to the manual cleaning of the cartridge or replace it.

Main features:

Maximum inlet pressure: 25 bar

Maximum working temperature: 130° C

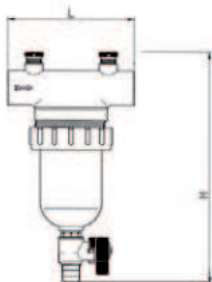

Filtration: 100 micron

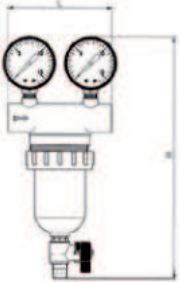

Threadings: UNI EN ISO 228

Alloy: Brass alloy CB753S UNI EN 1984

Gauge connection: 1/4"

Suggested gauge: diam. 63 range 0-16 bar, connection 1/4" radial - Item N 119.16

Attacchi: UNI EN 228

Connessione manometro: 1/4"

Manometro consigliato: manometro diam. 63 scala 0-6 bar, attacco 1/4" radiale - Art. 119.6

Automatic filling unit for heating systems, with brass diaphragm system, standard version. Built-in filter, non return valve, stopcock and adjustable outlet pressure; completely made in brass. Male fitting on inlet.

Main features:

Maximum inlet pressure: 10 bar

Outlet pressure range: 1 - 4 bar

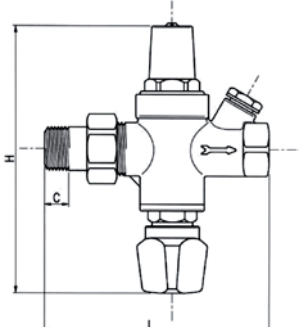

Maximum working temperature: 80° C

Factory setting: 1,5 bar

Threadings: UNI EN ISO 228

Gauge connection: 1/4"

Suggested gauge: diam. 63 range 0-6 bar, connection 1/4" radial - Item N 119.6

VALVOLE SPECIALI - SPECIAL VALVES

EASY-K

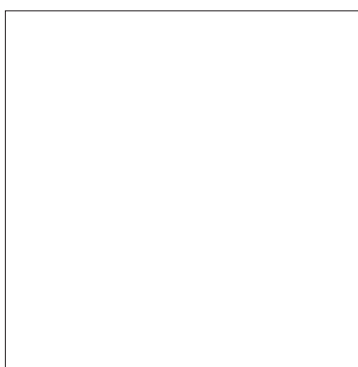

Valvola EASY-K di collegamento per vasi d'espansione sicurezza con rubinetto d'arresto sigillabile, rubinetto d'arresto per facile scarico del vaso. La valvola EASY-K permette la sostituzione del vaso d'espansione senza svuotare completamente l'impianto.

Principali caratteristiche:

Pressione massima: 10 bar

Temperatura massima di esercizio: 130° C

Attacchi: UNI EN 228

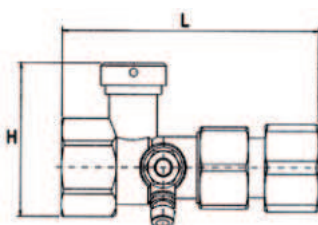

EASY-K valve is a special valve for expansion tank connection, with stopcock and drain. Thanks to this valve the inspection or replacement of expansion tanks can be made easily and without draining the complete system.

Main features:

Maximum inlet pressure: 10 bar

Maximum working temperature: 130° C

Threadings: UNI EN ISO 228

COMPONENTI PER IMPIANTI SOLARI - COMPONENTS FOR SOLAR INSTALLATION

SERIE V125 - V915 - 220M - 225M

Componenti per impianti solari: V125 valvola di sfiato aria per impianti solari, corpo e cappuccio in ottone. Disponibili in ottone sabbiato o nichelato; V9?? valvola di sicurezza per impianti solari disponibili con varie regolazioni, 220M/225M raccordi tre pezzi MF in ottone con tenuta metallica per impianti solari.

Principali caratteristiche:

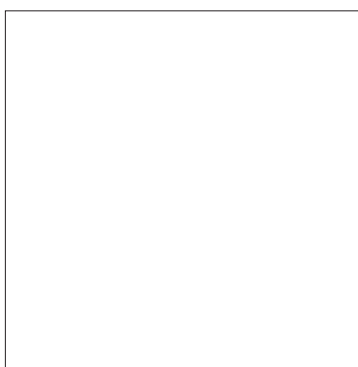

Pressione massima: 10 bar (V25-V915) - 25 bar (220M/225M)

Pressione massima di scarico V25: 2,5 bar

Regolazioni disponibili V915: 6 bar

Temperatura massima di esercizio: 110° C

Attacchi: UNI EN 228

Components for solar systems: V125 airvent for solar system, available in sand blasted brass or nickel plated; V9?? safety valve for solar systems; 220M/225M MF brass fittings for solar systems.

Main features:

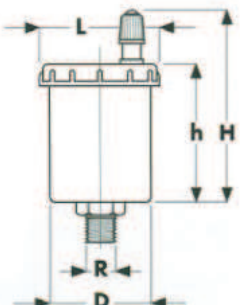

Maximum inlet pressure: 10 bar (V125-V915) - 25 bar (220M/225M)

Maximum discharge pressure V125: 2,5 bar

Available settings V9??: 1,5 - 1,8 - 2,5 - 3 - 3,5 - 4 - 5 - 6 - 7 - 8 - 10 bar

Maximum working temperature: 110° C

Threadings: UNI EN ISO 228

SERIE 161.34 - 163 - 164

Raccordi 2 pezzi speciali con dado folle, in ottone sabbiato, sede piana e guarnizione in fibra. Utilizzabili per acqua e aria.

Art. 161.34: versione telescopica, estensione minima 66mm, massima 95mm, con foro per sigillo.

Art. 163: versione MF 58mm fisso, con foro per piombatura.

Art. 164: versione FF 24mm fisso.

Principali caratteristiche:

Pressione massima: 25 bar

Guarnizione: fibra esente amianto

Temperatura massima di esercizio: 130° C

Attacchi: UNI EN 228

Special brass fittings 2-pcs with free nut, flat seat with fibre gasket. Suitable for water and air.

Item 161.34: MF telescopic version, minimum extension 66mm, maximum 95mm, with hole for seal.

Item 163: MF version with 58mm fix lenght, with hole for seal.

Item 164: FF verison with 24mm fix lenght.

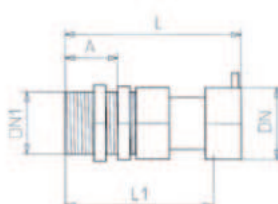

Main features:

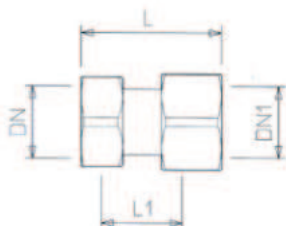

Maximum inlet pressure: 25 bar

Gasket: non asbestos fibre

Maximum working temperature: 130° C

Threadings: UNI EN ISO 228

SFERE PER RUBINETTI A GALLEGGIANTE - BALL FOR FLOAT TAPS

SERIE B19 - SERIE B20 - SERIE B21

SERIE B19.1A: Sfera in plastica tonda con raccordino in ottone filettato 1/4w per asta tonda, diametri 90-120; utilizzabile per galleggianti serie B2-B5-B8-B18.

SERIE B19.1B: Sfera in plastica tonda con raccordino in ottone filettato 5/16w per asta tonda, diametri 120-150; utilizzabile per galleggianti serie B9.

SERIE B19.3: Sfera in plastica piatta con raccordino in ottone filettato 1/4w per asta tonda, diametro 90; utilizzabile per galleggianti serie B2-B5-B8-B18.

SERIE B19.4: Sfera in plastica saldata con raccordino passante in ottone filettato 5/16w per asta tonda o piatta, diametri 120-150-180-220-300; utilizzabile per galleggianti serie B4-B14-B15.

SERIE B19.5: Sfera scorrevole con dado in ottone (SCR), diametro 60; utilizzabile per galleggianti serie B8-B18.

SERIE B19.6: Sfera in Moplen piatta per alte temperature con raccordino in ottone filettato 1/4w per asta tonda, diametri 90; utilizzabile per galleggianti serie B2-B5-B8-B18.

SERIE B20.1A: Sfera tonda in rame con raccordo in ottone filettato 1/4w per asta tonda, diametri 90-100-120; utilizzabile per galleggianti serie B2-B5-B8-B18.

SERIE B20.1B: Sfera tonda in rame con raccordo in ottone filettato 5/16w per asta tonda, diametri 120-150-180-200; utilizzabile per galleggianti serie B9.

SERIE B20.2: Sfera tonda in rame con raccordo passante per asta piatta, diametri 90-100-120-150-180-200-220-250-300; utilizzabile per galleggianti serie B4-B13-B14-B15.

SERIE B21.1: Sfera tonda in acciaio inox con raccordo in ottone filettato 1/4w per asta tonda, diametri 90; utilizzabile per galleggianti serie B2.

SERIE B21.2: Sfera tonda in acciaio inox con raccordo passante per asta piatta, diametri 130-160-220-250-300; utilizzabile per galleggianti serie B4-B13-B14-B15.

SERIES B19.1: Round plastic ball with brass nut threaded 1/4w for round rod, diameter 90-120; suitable for float taps series B2-B5-B8-B18.

SERIES B19.1B: Round plastic ball with brass nut threaded 5/16w for round rod, diameter 120-150; suitable for float taps series B9.

SERIES B19.3: Flat plastic ball with brass nut threaded 1/4w for round rod, diameter 90; suitable for float taps series B2-B5-B8-B18.

SERIES B19.4: Round welded plastic ball with nut for flat rod or round rod threaded 5/16w, diameter 120-150-180-220-300; suitable for float taps series B4-B14-B15.

SERIES B19.5: Sliding plastic ball with brass nut (SCR), diameter 60; suitable for float taps series B8-B18.

SERIES B19.6: Flat Moplen ball for high temperature with brass nut threaded 1/4w for round rod, diameter 90; suitable for float taps series B2-B5-B8-B18.

SERIES B20.1A: Round copper ball with nut threaded 1/4w for round rod, diameter 90-100-120; suitable for float taps series B2-B5-B8-B18.

SERIES B20.1B: Round copper ball with nut threaded 5/16w for round rod, diameter 120-150-180-200; suitable for float taps series B9.

SERIES B20.2: Round copper ball with nut for flat rod, diameter 90-100-120-150-180-200-220-250-300; suitable for float taps series B4-B13-B14-B15.

SERIES B21.1: Round stainless steel ball with nut threaded 1/4w for round rod, diameter 90; suitable for float taps series B2.

SERIES B21.2: Round stainless steel ball with nut for flat rod, diameter 130-160-220-250-300; suitable for float taps series B4-B13-B14-B15.
