ABOUT US

MAY is a well known Turkish company with international investor (ENO Group) located in İstanbul, Turkey. For over 10 years with the aim of quality, after sales services and futuristic view of look to our business, we are producing high quality kitchen sinks and accessories. Basing of profound knowledge, experience and familiarity with following the latest trends. MAY is producing huge numbers of units annually with the latest technology knowledge and expert trained employees in a closed surface of 5.000 m² almost 95% of which are exported.

In conformity with it's broader vision, MAY has always recognised the importance of continuous investment in new technology and innovation by always adding new machinery, moulds and improving it's production methods.

Doing our maximum to use our big network worldwide to build the trust and give a value to our brand name with faithful relations with all of our customer as a partner of success.

MAY products are conformed to CE certificate requirements, and the company is ISO 9001:2015 certified, ensuring high quality standards. In addition, the design, production and sales of stainless steel sinks have ISO 9001 Quality Management System and ISO 14001 Environmental Management System certification. The company is also OHSAS 18001 Human Resources Management certified for its Safety and Health Management System.

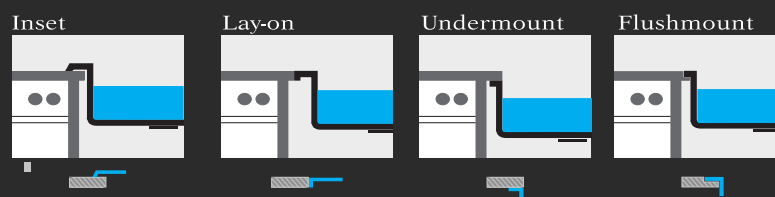

Thank you for being part of the MAY family.

KITCHEN SINKS

HOW TO INSTALL A SINK ?

Place the sink upside down in the position where it is to be installed, and trace the outline of the sink on the counter top with pencil.

Draw another line 10 mm inside the first line. Cut a hole in the counter top following this second, inner, line. (-If a pattern is included in the package, then use it to cut the hole in the counter top.)

Adhere the sealing tape around the under side of the edge of sink, starting not at a corner, but any other random spot. Ensure that the tape is sealed smoothly at the bottom of the rim between the clip rail and the edge of the perimeter of the sink. In case that the packaging includes a spongy sealing tape, adhere the tape closer to the edge of the sink, being careful not to overhang it.

Place the fixing clips evenly space around the perimeter of the sink. And pull them up to lock into their horizontal position. To place the sink into the work top, push the metallic part of the clips inward.

These fixing clips are designed to be used counter tops 30-40 mm. If your counter top is thinner, insert wooden wedges between the counter top and the clips so as to secure the.

Use a hand screwdriver to screw partially the fixing clips by following the order that the drawing indicates. When all the clips have been relatively secured in place, repeat the procedure by tightening completely each fixing clip.

A close-up photograph of a modern, stainless steel kitchen sink. The sink is a single-basin design with a smooth, rounded interior. A chrome faucet is visible in the upper left corner. The sink is set into a light-colored countertop. The background is slightly blurred, showing the edge of the countertop and the wall.
